HOSTWAY

FlexCloud™ Servers

PERFECT FOR INSTANTLY DEPLOYING SERVERS AND RESOURCES ON DEMAND

Designed to be one of the most flexible, reliable, and easy-to-use cloud hosting solutions on the market, FlexCloud™ Servers are a scalable, on-demand cloud computing solution that combines the flexibility of a public cloud with the reliability and performance of an enterprise grade virtual environment.

THE BENEFITS OF FLEXCLOUD SERVERS ARE CLEAR

ON-DEMAND SCALABILITY

Turn services on and off on the fly to scale up or down to exactly the amount of computing power you need, exactly when your business needs it. Buy only what you need to get started and grow your performance seamlessly to accommodate changing demands.

COST EFFECTIVE

Hourly and monthly rates with no long-term commitment let you optimize your cost/performance balance and return on computing investment. Pay only for the computing power you need and use.

EASE-OF-USE

Full control via the FlexCloud Portal provides streamlined and simplified management of your server and a direct connection to all of the tools to customize your solutions.

SUPERIOR SUPPORT

FlexCloud Servers are fully supported by our in-house data center experts. You can be confident that help is only a phone call away, 24x7x365. We manage and monitor.

RAPID PROVISIONING

Once your order has been placed and verified, FlexCloud Server provisioning is completely automated. Your instance can be ready for login in as little as 15 minutes.

FULLY CUSTOMIZABLE

Create cloud servers customized to application requirements, no fixed hardware resource packages. Resources such as firewall, load balancing, snapshots, and images can be added on demand. Full support for both Linux and Windows operating systems.

OPEN SOURCE API

Easy-to-use, system-to-system interface allows easy access and management of cloud environment anytime and anywhere. Save money by automatically scaling cloud servers to meet your needs.

HOSTWAY

FlexCloud™ Servers

HOSTWAY CLOUD INFRASTRUCTURE

Unlike most public clouds, FlexCloud Servers incorporates high availability features including automated failover of instances, fully redundant host, network, and storage hardware, and enterprise class Storage Area Networks to increase performance and reliability. With FlexCloud, users sacrifice neither speed nor reliability to gain the flexibility of true cloud computing.
